

New Service Announcement for Health Care Client Employees

Clinics Now Offering Online Appointment Scheduling

Hooray! We now offer our patients online scheduling.

With our new online scheduling tool, patients can view health care providers' available appointment time slots from any non-mobile, Internet-enabled device and conveniently self-schedule appointments online. New and existing patients can schedule appointments with any participating provider via our website.

Online scheduling supports our goal of providing easy scheduling access to new or existing patients. It is one more way for patients to access care and it offers the convenience of booking appointments anytime from anywhere. Benefits include promotion of practice growth and profitability by bringing in new patients and providing ease of scheduling for returning patients. In addition, online scheduling is expected to reduce call volume for schedulers, making the appointment-scheduling process more efficient.

Our project and clinic leaders thank all involved for their hard work and willingness to schedule patients in a new way.
